Part of the popular BERA/SAGE Research Methods in Education series, this is the first book to specifically focus on the ethics of Education research.

Drawing on the authors’ own experiences and secondary research from across the globe, this accessible book includes a range of examples from different areas and stages of education. Each chapter begins with a thought-provoking case study to encourage engagement with key questions.

Exploring ethical issues raised at all stages of a research project, topics covered include:
- gaining informed consent
- providing information in the right way to participants
- presenting and disseminating findings in line with ethical guidelines

All researchers, irrespective of whether they are postgraduate students, practising teachers or seasoned academics, will find this book extremely valuable for its rigorous and critical discussion of theory and its strong practical focus.
